

Faronics Anti-Virus

Works with: 

Faster, Lighter, Stronger Malware Protection

IT security is a difficult job. With over 73,000 unique pieces of malware identified daily, keeping your organisation safe can be overwhelming. The Internet is overflowing with security threats and to make matters worse, new malware is increasingly sophisticated. It can make for a lot of sleepless nights. Get the best protection you can find with Faronics Anti-Virus.

Faronics Anti-Virus is a complete solution that combines anti-virus, anti-spyware, and anti-rootkit technologies. Built from the ground up, it offers the most effective malware detection and remediation on the market with superior performance. It stops threats without slowing productivity with high speed scanning at rates over 2200 Mb/second. And it's lean too. Users won't even notice it running in the background because it's extremely lightweight and offers the most efficient use of memory, disk and CPU resources.

It keeps your data safe and viruses at bay with a single engine that harnesses multiple tiers of proactive protection. Faronics Anti-Virus combines signature-based detection and heuristics with a virtual environment to catch zero-day threats. It also offers email protection, a firewall, an IDS, and HIPs to keep users safe. Advanced features like web filtering and ad blocking reduce the risk of malware even further while boosting user productivity.

Central management through Faronics Core Console makes deployment and management a breeze. Now you can say goodbye to Maintenance Windows with seamless integration with Faronics Deep Freeze.

100,000
new web threats
created every day

Did You Know?

1 in 6 PCs
don't have basic security protection installed or active.

“If someone questions the effectiveness of Faronics Anti-Virus, it is extremely easy to highlight its value through workstation scan result reports which showcase what **malware was blocked** and at what time for each machine.

— Greg Atkins,
Director of Technology,
Glenpool Public Schools

In the US alone,
there are about
141 victims
of cybercrime
every minute.

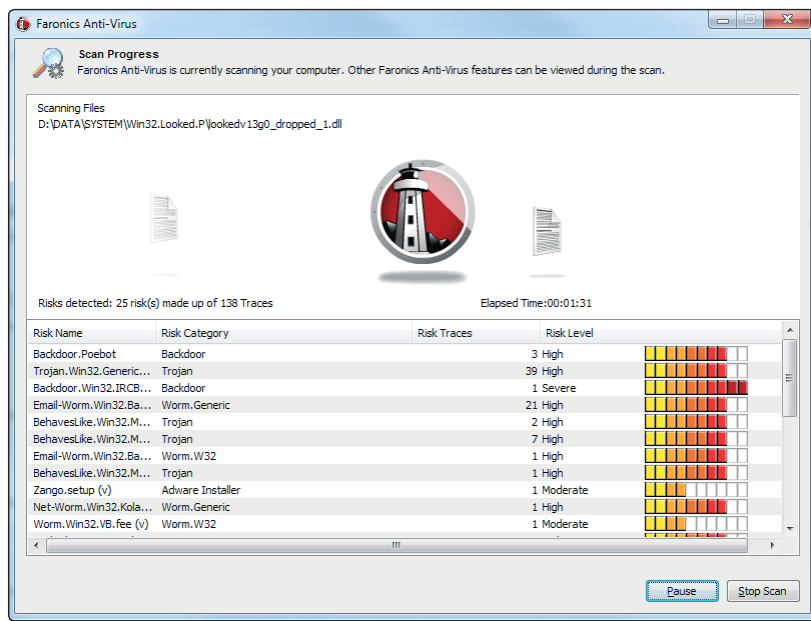

— Norton Cybercrime
Report, 2010

Faronics Anti-Virus
has been a godsend
with low impact on
system resources
and a full integration
with Deep Freeze to
deliver updates without
putting Deep Freeze in
maintenance mode.
**It's performed
better than
other anti-
virus solutions
out there.**

— Amos Painter,
IT Technician at Augusta
County Public Schools

Scan Your Computer To Determine Your Level Of Risk

Efficient and Effective Protection

Malware is the leading cause of corrupted PCs, damaged applications, and lost productivity. Enjoy peace of mind with superior PC and email security with Faronics Anti-Virus. It monitors and protects against real-time threats to keep computers safe using three types of detection methods including signature-based technologies, heuristics, and behavioral analysis.

Leave the bloatware behind with Faronics Anti-Virus. It's faster and lighter with top marks for performance. It can scan large volumes of information quickly with minimal impact on the end-user. It secures your computers against viruses and malware, while protecting your confidential information – all without slowing down user machines or the network.

Faronics Anti-Virus Benefits

- **Lighter:** scan large volumes of information quickly with minimal performance impact
- **Faster:** protect PCs quickly with scan speeds 300% faster than the competition
- **Stronger:** active protection detects malware using 3 types of analysis including signatures, heuristics, and behavior
- **Advanced:** web filtering and ad blocking boosts user productivity and reduces security risks further
- **Integrated:** seamless integration with Deep Freeze to update machines effortlessly
- **Simple:** central management makes enterprise-wide updates easy
